OBJECTIVE

I am capable of handling a wide range of development and technical operations roles within the IT field. I am driven by learning, impact, and value creation rather than monetary incentives or short-term benefits.

PROJECTS

DIGITAL PASSPORT SYSTEM (DPS)

Personal Project | HTML, CSS, Python(Flask), Mongodb

- Developed a web-based Passport Automation System to reduce manual work and automate e-passport generation.
- Implemented secure user authentication and real-time data validation to enhance accuracy and efficiency.

PROBLEM TO PRODUCT FINDER CHATBOT (url - PTP Chatbot - a Hugging Face Space by Host123)

Personal Project | Python(Streamlit),RAG, Hugging Face spaces(Hosting)

Built an AI-powered chatbot using Python and Streamlit with RAG-based GenAI that analyzes user problems and recommends suitable products by understanding real-life needs contextually..
